Directions:

Enter the number of answers received for each choice for each question; you are recording each student's response to your test questions. After you complete your entries in the worksheet, analyze your results to determine if any of your test questions need revising. State your findings and solutions for revising or correcting your question stem in the space provided on pages 2 – 3. If no revisions are required for a particular question, enter "No revising required." in the space provided.

The example below indicates that 10 students took the test. Two of the students answered A, seven of the students answered C (the correct answer, as indicated in the "Answer" space), and one student answered D, for a total of 10 test takers. An N/A for choice E indicates that there were only four choices offered for question 1.
